CDFI Reporting Module

Are you a Community Development Financing Institution (CDFI)?

New guidelines from the CDFI Fund require most CDFIs to report transaction-level data regarding their community lending portfolio.

DLM's CDFI Reporting Module gives you the ability to:

- report electronically to the CDFI Fund through their CIIS system
- transmit transaction-level data on all community loan fund accounts
- complies with the CDFI's preferred reporting format (XML) for electronic reporting

License Cost: \$575.00
